1) Don't:

Leave Without Taking Pictures of Where You Fell

You shouldn't leave the spot where you fell without taking pictures. You need to take pictures of the cause of your accident. Don't leave the scene without evidence of your slip and fall.

2) Do:

Get to the Doctor Right Away

Get to the doctor as soon as you can. You need to get treatment for your injuries. You don't want to be in pain, so get yourself to the doctor and listen to all of their advice. Avoiding the doctor isn't good for you or your case.

3) Don't:

Talk to the Insurance Company

The insurance company is not going to help you get a fair result. They want to save themselves money. Their representatives will try to get a statement from you. Do not give them one— it will only hurt your claim.

4) Do:

Hire a Lawyer Right Away

You will be glad that you hired an expert. You want to have someone on your side who has done this before. A trial lawyer will be able to get you the results you deserve.

5) Don't:

Try to Do This Alone

You shouldn't try to go at this alone. You don't have to. You might be hesitant to hire a lawyer, but you're more likely to get the result you deserve with a lawyer by your side.
