1 Delay Seeing a Doctor

A female doctor with brown hair and black-rimmed glasses, wearing a white lab coat, is seated at a desk. She is holding a large X-ray of a human leg and pointing at it with her right hand. A male patient with dark, wavy hair is seen from the back, sitting across from her. The background is a bright, modern office with a white shelf holding various decorative items and a green plant on the right. A large, semi-transparent circular graphic is overlaid on the bottom half of the image, containing text.

You need to get your injuries looked at immediately. It will only hurt your case if you wait. We want you to start feeling better as soon as possible, so get to a doctor right away.

Take a Call from the Insurance Company

to save their company money.
Giving a statement to them
is not going to benefit you.
We strongly advise you
ignore their calls until you
get a lawyer.

You may not be guilty. Do not claim any blame for your accident. There's no way to know for sure that you caused the accident. If you say it was your fault, you could ruin your case.
